ABOUT US

Born From Passion

Nyati Wildlife Art was established in 2004 by professional hunter and founder Manfred Egerer who recognized the need for a quality Taxidermy service in Namibia. Manfred and his team of 27 skilled craftsmen make it their business to ensure you know your trophy is in good hands throughout the whole process. The team at Nyati Wildlife Art respect the animals that were hunted. That is why they keep you informed on the progress made and why they aim to deliver quality work within a reasonable time-frame at a realistic price.

We are serious about what we do. Our focus is not only on quality and service, but also on being creative in our approach. Nyati Wildlife Art is a one stop facility. From the pick-up of the trophies to the shipping, we offer a complete, personalised taxidermy service. We create unique custom made trophy mounts for each individual client. From the veld to your foyer!

It's not just a trophy - it's a reminder of that single incredible moment that comes after months of planning, waiting and finally taking the perfect shot. Nyati Wildlife Art treat every mount as special and expertly craft it into a masterpiece worthy of your lasting memory. Make your hunting experience a talking point for years to come with Nyati Wildlife Art.

WHAT OUR CLIENTS SAY

The Nyati team,

...I wanted to send a message sharing my joy with the packaging and taxidermy work you've done on my trophies. The way they were packed, there was no damage to the trophies, the pedestal mounts were easy to assemble. The rugs and European mounts were packaged perfectly to protect them. I have to mention the details that had been put into the final product, very lifelike. Its uncanny that the Kudu has the exact same look he had when I pulled the trigger. Great Job!!....Thank you again.

Kevin Fischer - USA

OUR SERVICES

From Veld To Foyer

TROPHY COLLECTION

Soon after your hunting safari is complete, we will arrange for the collection of your trophies from your hunting outfitter. As soon as your trophies and paperwork have been received, our team will make contact and discuss your order. We encourage our clients to tell us exactly what they want, thus every order is custom made.

CLEAN & BLEACH

Our experienced team clean and bleach the skull, allowing it to be displayed on a wall, table or shelf. This allows for the additional option of tanning the hide for use as a rug or be manufactured into trophy mounts.

DIP & PACK

If you wish to have your taxidermy processed at a later stage, we offer a Dip & Pack service. This is the sterilising process necessary to export any raw animal part across international borders. It is the removal of all flesh and tissue from skulls, horns and bones as well as the drying and bleaching of skulls and bones. The skin is dried, cleaned and treated with anti-bacterial products to ensure your trophy arrives in a dry, and pest free condition.

TANNING

Nyati Wildlife Art has its own tanning facility to tan your trophy's skin to the highest standard. This is where we begin the process of turning the raw skin, which is susceptible to degradation, into a durable product. Tanning of skins is a 3-month process.

TAXIDERMY

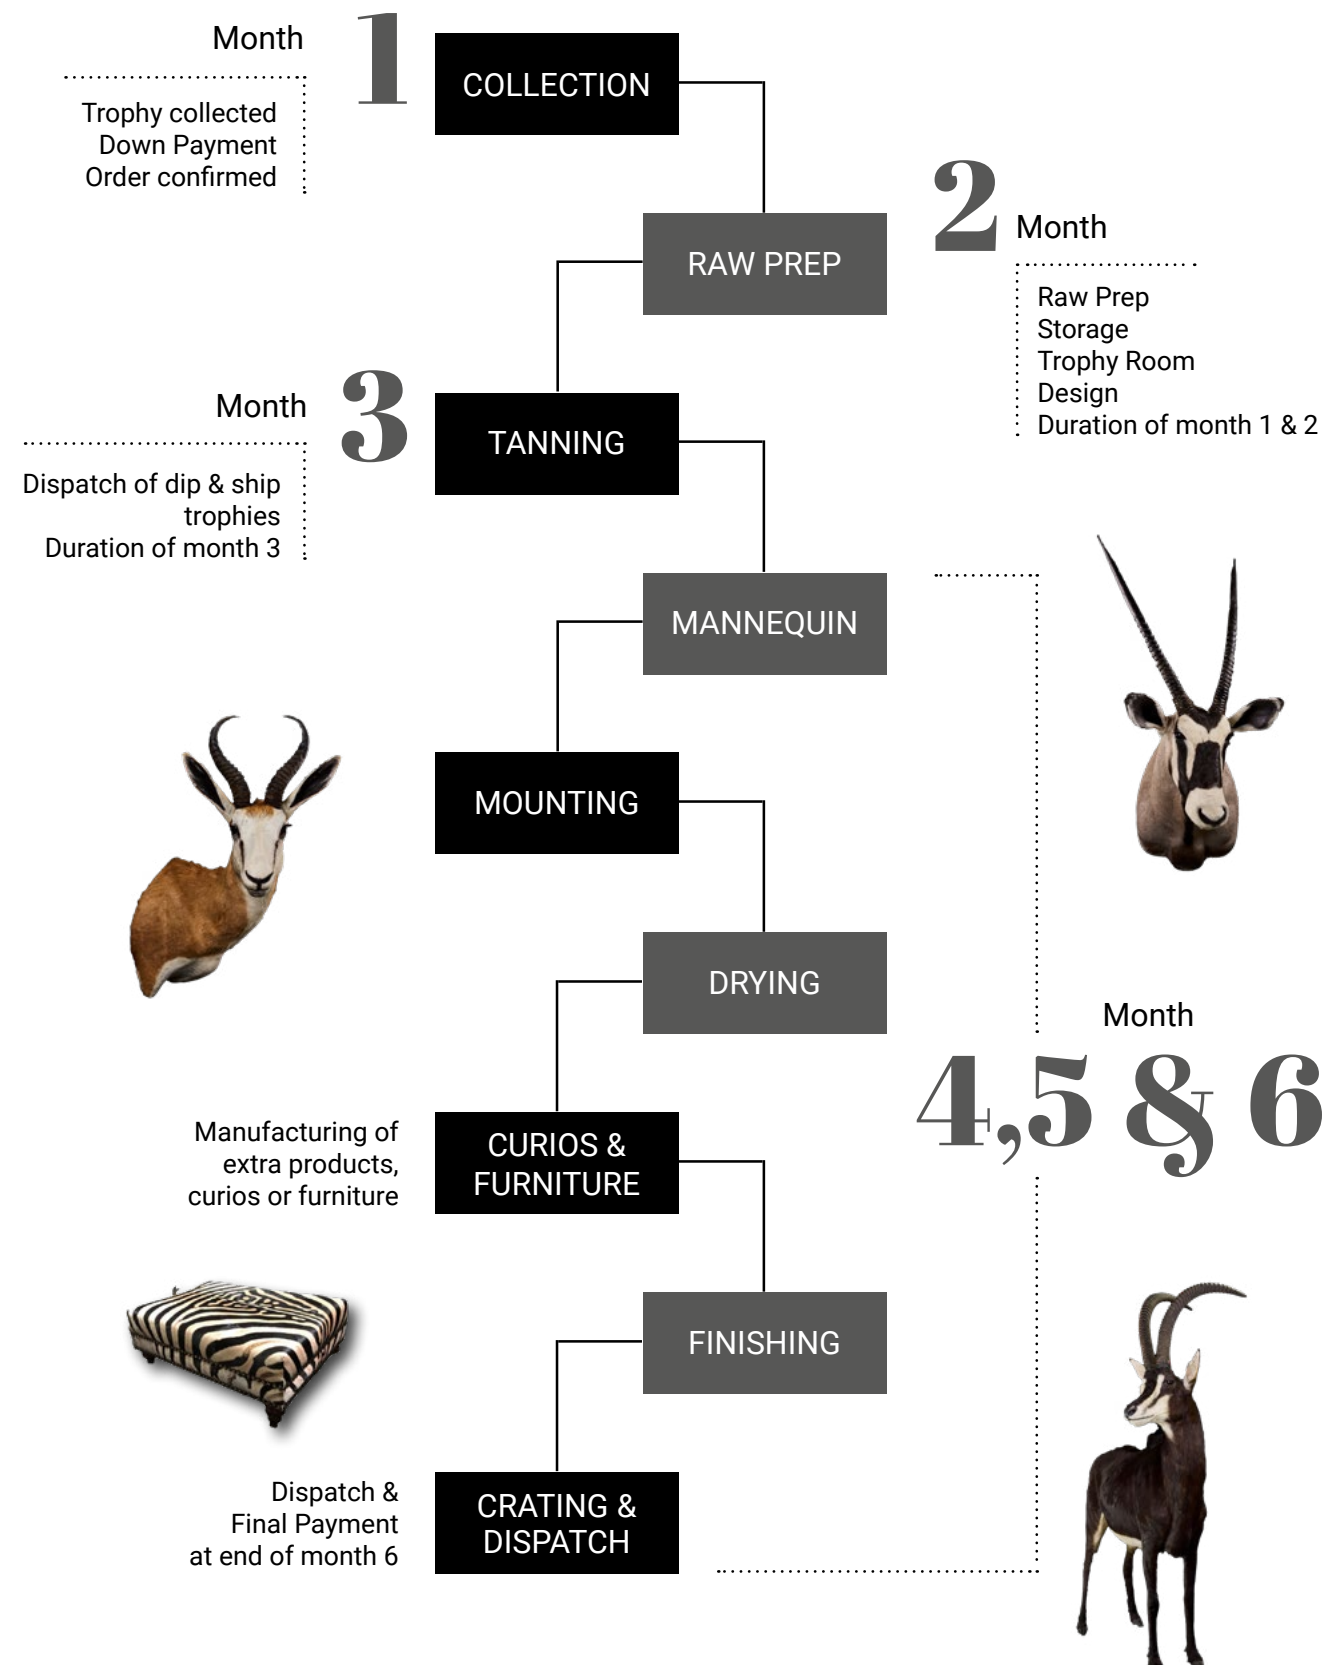

Quality is no coincidence. We bring extensive experience to the table when it comes to crafting your trophy in a way that honours the animal and your hunting memories, from collection to final touch.

PACKAGING, INSPECTION & LOGISTICS

Packaging and storage of trophies following completion of cleaning and/or taxidermy and tanning work. It involves arranging Cites inspections and ISO-coding of trophies where applicable; obtaining export permits and veterinary certificates; cargo bookings and customs formalities. We connect to a worldwide network of trusted clearing agents specializing in the importation of hunting trophies.

TAXIDERMMY

Timeline

MOUNT TYPES

From Small To Tall

All our trophy mounts and bases are made bespoke in our well-equipped facility in Windhoek, including rug mounts and other special mounts.

FULL MOUNT - FM

The full mount makes use of the full skin of your animal. It can be mounted on a base of the trophy's natural habitat (e.g. artificial rock or tree, sand and vegetation) or on a polished, modern, designed base.

HALF MOUNT - HM

A half mount makes use of the cape and includes the front legs and hooves. The mount can hang from a wall or stand on the floor.

OFFSET SHOULDER MOUNT - OM

A more modern version of the traditional shoulder mount that shows more of one shoulder and thus the colour and beauty of the trophy.

PEDESTAL MOUNT - PM

The pedestal mount makes use of the cape and is then mounted on a pedestal base that can be of any size. This is the best option if you have limited wall space or low ceilings.

SHOULDER MOUNT - SHM

A shoulder mount makes use of the cape, skull and horns to mount with a choice of pose options.

SKULL ON SHIELD (EUROPEAN MOUNT) - SOS / EM

With a skull on shield the skull is cleaned, bleached and cut before mounting on a wooden shield, allowing it to be displayed on a wall, table or shelf.

WALL PEDESTAL - WP

A wall pedestal makes use of the cape, skull and horns to create an off centre shoulder mount that presents your trophy hanging on the wall with one shoulder more exposed than the other.

CODES

Species & Mounts

SPECIES	CODES	MOUNT OPTIONS	CODES
Baboon	BA	Full Mount	FM
Black Wildebeest	BLAG	Half Mount	HM
